

MANUFACTURER, EXPORTER & SUPPLIER
*Brilliant Performance, Minimal Maintenance,
Innovative Designs and Durability.*

Sohum Autogas Systems Pvt. Ltd. gears itself up to boost R & D initiatives complying with the principle of sustainable and useful innovation for manufacturing high-efficiency **Gas Safety Devices** that is effectively compatible for getting fitted into gas conduit. Our series of **Gas Safety Devices** is designed with high-performance diaphragm and valve added to the leak gas passage. The obstruction to gas supply from gas faucet generally causes danger that can be averted by robustly fabricated Gas Safety Device that operates in order to prevent the flow of gas to consuming apparatus. The company is committed to meeting the challenges for operating sustainably, meanwhile it is delivering innovative devices that help in regulating and controlling flow and supply of gases and fuels in order to optimize the consumption as well as ensure safety.

Our leadership in manufacturing **Gas Safety Device** positions us singularly to deliver more efficient, stronger and more sustainable solutions to meet industry's challenges. gas safety devices are designed by us, overcoming the disadvantages and drawbacks including quick opening of valve and consumption long time in re-opening the valve, etc, demonstrating the features like automatic closing of valves owing to interruption to the gas supply as well as cleaning option for valve passage from impurities. Since 2005, our accomplished production team has resolved to manufacture innovative product line that moves the forward while following the principle of benefiting the customers with honest and accountable dealings.

Technical Attributes :

- Designed in a way that wards off danger caused by interruption to gas supply
- Characterizing lost-motion and effective connectivity between a diaphragm and a valve
- In the situation of leak it altogether shuts off the gas supply and helps preventing any hazard (medium or heavy leak)
- low level indication in the case of If LPG in the cylinder is about to get finish.
- Automatic closure to cut off the gas supply in case of interruption
- Provided with different efficient control elements
- Low gas indicator, Easy installation & control over gas pressure
- Allowing the saving of 20 percent of gas
- Brilliant performance, minimal maintenance, innovative designs & durability
- Ensuring the reliability in the service of our ingeniously fabricated device

Why to Choose Our Range of Gas Safety Devices ?

- Fabricated from high-standard constituting components including Inlet & Outlet Port, Housing, Valve, Conduit, Diaphragm, etc.
- Cost effectiveness, Improved quality, efficiency & dependability in service and other mechanical features.

Accreditation & Recognition of Our Range:

- Our range of Gas Safety Device is certified by CE Mark
- Supplying range through a widespread dealer network consisting of about 80 retrofitting centers in India
- Our product line is ascertained by ISO 9001:2008
- Our range is suitably used in domestic LPG cylinders

Quick Buyer Details	
Business Type	Manufacturer, Exporter, Supplier
Product Name:	Gas Safety Device
Product Code:	GSD
Model Number:	SOHUM GSD
Brand Name	SOHUM AUTOGAS
Place of Origin:	Pune, Maharashtra
Year of Establishment:	2005
Usage	Residential, Industrial
Type:	Gas Safety Device
Certification:	ISO 9001 standards
FOB Price:	Negotiable, Sent by mail
Min. Order:	As per requirement
Supplying Ability:	We can take/supplies Bulk orders
Export Markets	<ul style="list-style-type: none"> • Bangladesh • Philippines • Africa
Payment Terms:	Cash / Credit/ T/T ,L/C
Packaging & Delivery	
Packaging Detail:	Safe packaging as per Industrial & International standard
Delivery Detail:	Timely delivery of consignments after confirming order & payment
Shipment By:	Sea, Air, Cargo
